## DETAILED ACTION

### *Information Disclosure Statement*

1. The references listed in the Information Disclosure Statements submitted on 11/25/97 have been considered by the examiner (see attached PTO-1449).

### *Double Patenting*

#### *Basis for Non-Statutory Double Patenting*

The non-statutory double patenting rejection, whether of the obviousness-type or non-obviousness-type, is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent. In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969); In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); In re Van Ornum, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); In re Longi, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); and In re Goodman, 29 USPQ2d 2010 (Fed. Cir. 1993).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(b) and © may be used to overcome an actual or provisional rejection based on a non-statutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.78(d).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. *Claims 17-36* are rejected under the judicially created doctrine of double patenting over ~~5,402,413~~  
~~5,640,674~~ since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

Art Unit: 2745

Regrading **claims 17-36**, it would have been obvious at the time the application was filed to modify the present claims by providing for the use of various transmission frequencies for cell differentiation, since it is well known in the art to use various transmission frequencies for cell differentiation.

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the above mentioned patent in order to ensure cell differentiation.
